

SCIENCE & Discovery CLUB AT FLEETWOOD MOUNT

Biodiversity Badge

Look for Collectives of Birds

Can you see which different species of birds flock together in the same trees? These are called Collectives of Birds.

Did you know that mixed species flocks help each other collectively; they watch for predators and cleverly preserve and guard food to last throughout the winter.

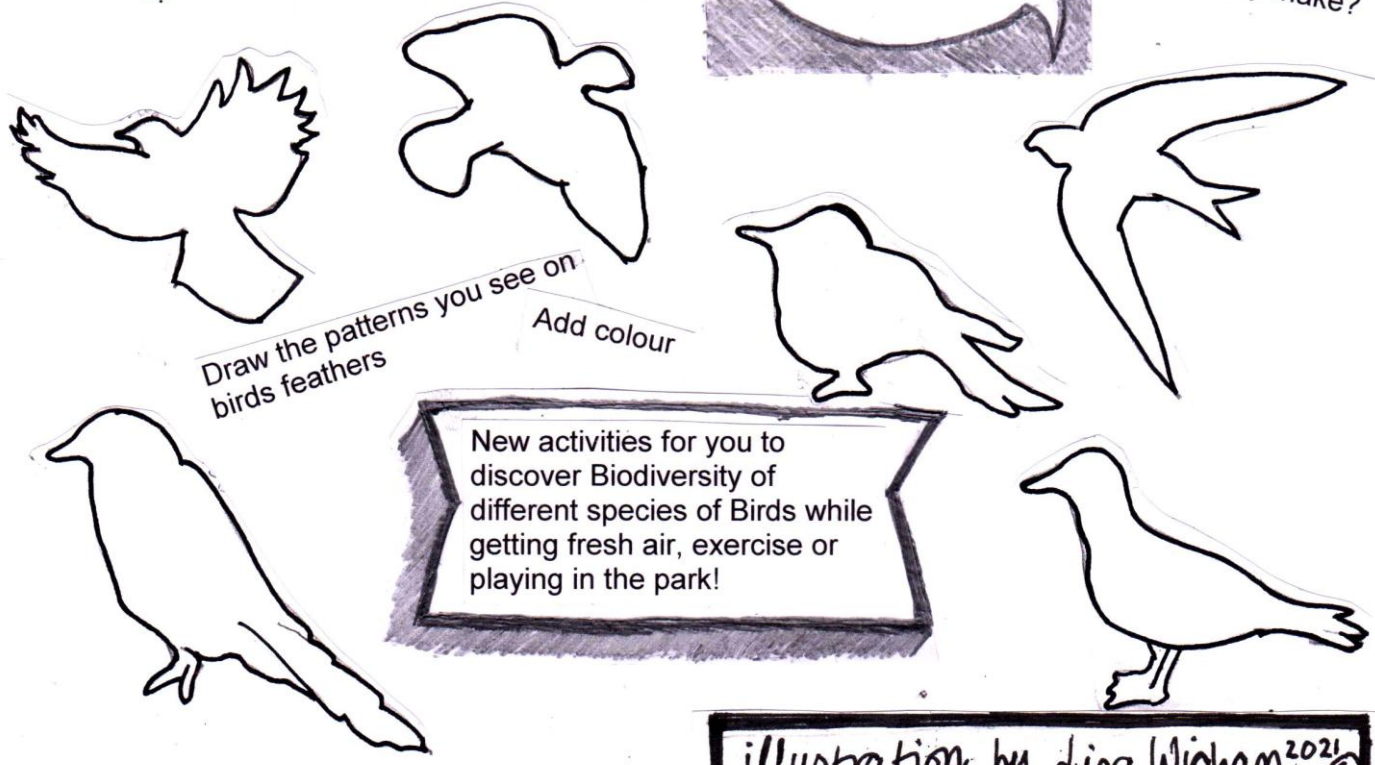

Using this worksheet - count and draw different species of birds working together at Fleetwood Mount park.

Look - How many different species of birds can you see?

Listen - How many different voices of birds can you hear?

Where can you see these?
 Bird Feeders? Trees? Bushes? A bird table?

What sounds do they make?

Draw the patterns you see on birds feathers
 Add colour

New activities for you to discover Biodiversity of different species of Birds while getting fresh air, exercise or playing in the park!
